 Option 1..... 4

 Option 2..... 4

How To

Install

To install the software you must have this Python libraries in the OS you use:

- **JSON**
- **REQUEST**
- **WEASYPRINT**
- **PyPDF2**
- **XML.DOM**
- **ElementTree**
- **URLLIB**

If you want to install this libraries in your system, type “**pip install *name of the package***” where the name of the package is specified upside. Then you have to create a root folder in your system to allocate the package.

Name the folder as what you want but inside it must have be a folder called “**pdfs_irs**” where the PDF of IRS allocated.

Use

To use the software you have to run the Python interpreter in any OS and run the actual **__init__.py** code. Then follow the instructions inside the terminal.

ATTENTION: For good performance of the software ensure you have a PDF file of the IRS archive.

Tutorial for general purpose

A guide step by step

1. Install all dependencies to ensure the correctly function of the software.
2. Run the software within make **__init__.py** code.
3. In the main menu, select one of two options show up:
 - a. **Option 1** (Search by text)
 - b. **Option 2** (Search by year-document number)
4. If you select the **Option 1**, you have to provide a name to search the document in Federal Register Database.
5. If you select the **Option 2**, you have to provide a document number (if you have it) and the year of emission.

You have to see something like that depends of what option you choose:

Option 1

```

----- GET DOCUMENT FROM THE FEDERAL REGISTER -----
(1) Insert the name of the document (loose, because make a search by name)
(2) Insert the document year and serial number (exact copy of the document)

Enter an option: 1
Enter the exact document name to search it: base erosion
[DOCUMENT NUMBER] 2018-27391
[DOCUMENT TITLE] Base Erosion and Anti-Abuse Tax
IS THIS YOUR DOCUMENT? Press [Y/n] ->
    
```

Option 2

```

----- GET DOCUMENT FROM THE FEDERAL REGISTER -----
(1) Insert the name of the document (loose, because make a search by name)
(2) Insert the document year and serial number (exact copy of the document)

Enter an option: 2
Enter a YEAR of a document (1990-2020) (FOUR DIGITS): 2018
Enter a DOCUMENT serial number: 27391
[DOCUMENT TITLE] Base Erosion and Anti-Abuse Tax
IS THIS YOUR DOCUMENT? Press [Y/n] ->
    
```

6. Then, you have to PRESS ENTER to continue and provide the PATH of the PDF IRS, according with the DOCUMENT TITLE of the last steps.

Example:

If a document search by Option 1 have the title **BASE EROSION AND ANTI-ABUSE TAX**, you should have a file (downloaded from IRS) according with that title.

7. The file named **FINAL_PREAM** and **FINAL_PROPOSED** will be saved in the root folder. The same of the `__init__.py`
